## Typical Information Needed For a Quotation of a Pad-Mount.

- Voltage- Custom designs range up to 35kV
- Current- Custom designs range up to 600A
- Number of transformers required per system
- Transformer accuracy requirement

All doors are reinforced, able to open 160 degrees with a door stop.

An anti-condensation coating material can be applied on the inside and outside of the enclosure in order to prevent exposed metal to condensate during rapid temperature changes.
